## **UNSOLVED HOMICIDE BARRON COUNTY, WISCONSIN: 1982**

In September 1982, the skeletal remains of an adult white male were found in Barron County, Wisconsin. Cut marks in the shirt and jacket correspond to cut marks on the thoracic vertebra. Therefore, this case is being investigated as a homicide, as it appears that the victim was stabbed to death.

The victim is a white male, 18 to 24 years of age, approximately 5' 7" to 5' 9" tall and weighing 180-190 pounds. He had a full set of teeth, with extensive, recent dental work. Additionally, the victim had surgical repair to the left knee, evidenced by a screw and staple installed in the tibia. The victim, found fully clothed, did not have a wallet or any identification on him at the time of discovery. No similar victims are entered as missing in NCIC, so to date this victim remains unidentified.

In September 2000, the Barron County Sheriff's Department commissioned a facial reconstruction using the victim's skull. This work was done by a nationally recognized forensic anthropologist who has been very successful in other similar cases. Therefore, we are confident that this reconstruction closely approximates what the victim looked like in 1982.

These photographs are not an actual portrait of the victim, but are a scientific reconstruction approximating what he looked like in 1982. Because his hairstyle and the presence or absence of a beard, mustache and eyeglasses is unknown, some modifications have been made.

Any agency having information that may lead to the identification of this victim is urged to call the Barron County Sheriff's Department at (715) 537-3106 or the Wisconsin Division of Criminal Investigation at (608) 266-1671.
